SUMMARY

Dedicated Artificial Intelligence student with strong foundations in Python programming, AI-assisted development, and front-end technologies. Experienced in building AI-based projects including handwritten text recognition and a mental health chatbot. Skilled in Linux, prompt engineering, and backend scripting. Seeking an opportunity in AI/ML Engineering, Software Development, or related domains to apply problem-solving and technical skills.

SKILLS

Programming

- Python
- Prompt Engineering
- HTML, CSS

Technology

- Linux
- VS Code
- Git & GitHub
- AI-Assisted Development

EDUCATION

Bachelor of Engineering – Artificial Intelligence and Machine Learning

- Mahendra Institute of Technology,Namakkal
- GPA: 7.2 / 10.0 | Expected July 2025

Diploma - Computer Science Engineering

- CSI Polytechnic college, Salem
- Percentage: 76%

SSLC

- Chinmaya vidyalaya metriculation school, Salem
- Percentage: 70%

PROJECTS

Handwritten Text Recognition System

- Developed a deep learning model to convert handwritten text into digital text.
- Collected and preprocessed image datasets for training and validation.
- Implemented a CNN-based architecture for accurate character recognition.
- Improved digitization efficiency for handwritten documents.

Mental Health AI Chatbot (LangChain-Based)

- Built an interactive mental health chatbot using Streamlit for UI.
- Integrated LLMs through Ollama for empathetic and context-aware responses.
- Added mood-based advice, affirmations, and guided meditation features.
- Ensured user privacy and created a supportive conversational environmen

CERTIFICATIONS & ACHIEVEMENTS

- COA – Certificate in Computer on Office Automation (Government of Tamil Nadu, DOTE)
- 5-Day Gen AI Agents Intensive Course – Google & Kaggle
- Participated in CODEVOLT ‘25 Hackathon by Rapteeh, in partnership with Zoho and VIT Chennai
- Built multiple AI mini-projects & automation scripts
